Wine specialists, like Olivier Poussier, Best Sommelier in the world 2000, trust VinoSafe.

You have a traditional cellar that is not satisfactory and the wine that you intend to keep for years could deteriorate. The **VinoSafe** wine cellar equipment enables you to customise your premises and even to transform all kinds of rooms into a perfect wine cellar.

Air-conditioning door

The air-conditioning door exists in 2 heights (1,91m et 2,03 m) and 2 cooling capacities :

- VSE PC1 for a cellar volume up to 12 m3
- VSE PC2 for a cellar volume from 12 to 40 m3

Thanks to its clever design, the air-conditioning door is delivered with a 3 duty mounting frame :

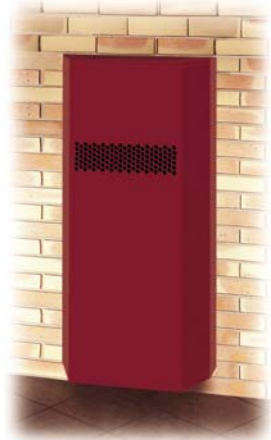

- **Air-conditioning** : with management of temperature, humidity, ventilation and air re-oxygenation
- **Insulation** : the steel door is insulated by a foamed polyurethane 5cm wall with a magnetic seal for optimal performance
- **Safety** : double steel panel and safety lock

Installation is quick, easy and **does not require drilling large holes in your wall.**

- ✓ Automatic evaporation of condensed water surplus
- ✓ Heating : stainless coated resistance
- ✓ Power : 400W cooling group and 430W heating resistance under operation
- ✓ Power supply : 230V, 50 Hz
- ✓ Maximum working installed capacity : 440W

Air-conditioning group

If your cellar does not have a sufficient height for our air-conditioning door, it is possible to install the air-conditioning group VSE CL1 or VSE CL2 with its frame on a cellar wall. **The air-conditioning group allows to maintain your cellar's temperature and to ensure re-oxygenation of the air.** The group is presented in 2 powers with cooling capacities of up to 12 m3 (VSE CL1) and from 12 to 40 m3 (VSE CL2).

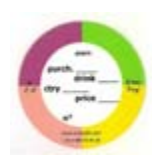

The air-conditioning capacities and the electrical characteristics are similar to those of the air-conditioning doors.

Humidity is mastered (vaporisation of condensed water) and controlled thanks to a wireless thermo-hygrometer delivered as standard. It gives you an objective measure of the key parameters.

Think a tour other products to equip your cellar :
